

3223 VM250 wood industry

Project nr: 3223
Client: Wood industry
Project supervisor: Knap Srecko
Forma Slovenia
Project engineer: Mikael Kayser TAWI AB

Large pieces of wood are lifted from the machine, rotated and placed on a pallet using a VM250 with straight yoke suction foot. Max capacity is 180 kg. This project is also available as a video, please request from info@tawi.se.

The VM250 is suspended in a Lyftman LR120 crane system covering a large area.
